|  | Over the past two years the net profit margin has increased $\checkmark$ from $46 \%$ to $50 \% \vee$ ．This indicates that the business is able to control its overheads／expenses better $\downarrow$ ． |  |
|  | The mark up has also increased $\checkmark$ from $161 \%$ to $215 \%$ indicating that a larger profit percentage is being added to the cost price of the goods ${ }^{\vee}$ ． |  |
|  | The rate of stock turnover has however declined $\checkmark$ from 4 times to 3 times ${ }^{\checkmark}$ indicating that stock is being held on average for a longer time before it is sold |  |
|  | Overall although the profitability of the business has improved over the two years the business is taking longer to sell their stock $\downarrow$ |  |
