(b) (ii) Calculate the mark up for 2005

Margin is 50\% so

| and Cost price $=$ | £2 | Mark up 100\% $\downarrow$ - |
| :---: | :---: | :---: |
| So Profit must be | £2 | $\checkmark$ |
| Let Selling price be | £4 | Margin 50\% ${ }^{\text {r }}$ |

(c) Liquidity measures the firm's ability to pay its debts as they fall due $\checkmark$ . The Current ratio in 2005 is $2: 1 \vee$.
Profitability is a measure of how successful the firm is comparing (for example) sales/capital employed etc $\checkmark \checkmark$. Net profit to sales figure in 2005 is $10 \% \checkmark$.
No figures $=$ maximum TWO $\checkmark$ for each point gives total $4 \checkmark$ 's
(d) Evaluation of performance between 2005 and 2006

Conclusion
Overall comment covering profitability $\checkmark$ and liquidity $\checkmark$ plus decision $\checkmark \checkmark$.
Comment on profitability $\checkmark$ with figure $\checkmark$ and further $\checkmark$ for development.
Comment on liquidity $\checkmark$ with figure $\checkmark$ and further $\checkmark$ for development.

## Example answer

The two main indicators of improved performance in 2006 are the higher margin $\downarrow$ ( $50 \%$ to 60\%) $\checkmark$ and the higher net profit percentage ( $10 \%$ to $12 \%$ ). Perhaps there is less competition in 06 enabling a higher margin on prices $\downarrow$. Expenses do not appear to have increased unduly enabling the $2 \%$ increase in profit on sales

However, 2006 shows much poorer liquidity $\downarrow$ (from 2:1 to $0.2: 1$ ) $\downarrow$. This is critical because in 2006 debts cannot be paid as they fall due $\checkmark$. The firm is vulnerable to its creditors.

Overall I do not believe the firm is in a superior position $\checkmark \checkmark$ because despite improved profitability ${ }^{\checkmark}$ creditors could force a closure ${ }^{\checkmark}$. $10 x \checkmark=5$ marks
