(30)

Only award balancing mark if both balances present and account has been correctly balanced off

Note : Alternative narrative for Cash book may be Cash or Bank in every case. The balances may be OF in every case.
(b) Prepare a trial balance at 31 October 2010.

## Trial Balance

## Award mark for correct figure or own figure from (a)

Note: Mark for total is OF but awarded only if the two totals agree (If the totals do not but a Suspense $a / c$ is introduced to make them agree then I mark is given - no mark awarded for the Suspense a/c entry itself)
(c) State, with reasons, whether you agree or disagree with this statement

The marks here are to be awarded (2) for disagreeing with the statement, a further (2) for stating that a trial balance only checks the arithmetical accuracy of the accounts a final (2) for identifying one of the six types of errors which would not be revealed.
(6)

## Sample Answer

No, I disagree** with this statement. A trial balance only checks the arithmetical accuracy** of the accounts, it does not reveal certain errors, for example, errors of omission**, commission, original entry, principle, compensation, complete reversal.
Note: marks gained can only be $0,2,4$ or 6

## Question 2

(a) Prepare journal entries for all the above items. Date your entries 31 December 2010 and include suitable narratives.

Note : All answers are for correct figure apart from the two marked OF. Also Net profit gains two marks if correct and one if OF

Only award mark for correct adjusted figure or own figure from (a)
(c) Using the adjustments for accruals and prepayments as an example, evaluate the importance of the prudence concept in the preparation of the final accounts

Award up to 4 marks for explanation of the prudence concept and up to 6 marks for an explanation of how adjusting for accruals and prepayments results in a more accurate set of final accounts

## Sample Answer

The prudence concept requires that final accounts should always report a conservative figure for profit* or the valuation of assets*. To this end, profits are not to be anticipated* and all known liabilities* should be provided for at the year end
The adjustment for accruals and prepayments is a good example of the application of this concept as by making these adjustments the business is able to report a profit* which accurately reflects the true* cost that has been incurred for the year* instead of simply the amount that has been paid*. The year end balance sheet will also show a true figure for both assets* and liabilities* by taking account of the prepayments and accruals* respectively.
(Total 45 marks)

## Question 4

4 (a) Calculate for both 2009 and 2010:
(i) Gross profit.

| $\mathbf{2 0 0 9}$ | $\mathbf{2 0 1 0}$ |
| :--- | :--- |
| $£ 25000-£ 10000=£ 15000^{*}$ | $£ 29000-£ 17500=£ 11600^{*}$ |

(ii) Net profit.

| $\mathbf{2 0 0 9} £ 15000-£ 1000=£ 14000^{*}$ | $\mathbf{2 0 1 0}$ |
| :--- | :--- |
| $£ 11600-£ 1200=£ 10400^{*}$ |  |

(iii)Gross profit margin.

| 2009 | 2010 |
| :--- | :--- |
| $15000 / 25000=60 \% *$ | $11600 / 29000=40 \% *$ |

(iv) Net profit margin.

| 2009 | $\mathbf{2 0 1 0}$ |
| :--- | :--- |
| $14000 / 25000=56 \%^{*}$ | $10400 / 29000=36 \% *($ or $35.86,35.8$ <br> or 35.9$)$ |

(v) return on capital employed.

| 2009 | $\mathbf{2 0 1 0}$ |
| :--- | :--- |
| $14000 / 5000=280 \% *$ | $10400 / 19000=55 \% *($ or 54.74 or |

(b) Evaluate William's claim (giving reasons backed up with figures) that the financial
performance of the business in 2011 was superior to that of 2010. In your answer you are expected to make equal reference to profitability and liquidity.

The key here is for the candidate to find reasons (identify a strategy) to explain their contention. Reasons must have validity and must be backed up by figures.
Evaluation of performance between 2009 and 2010
Comment on profitability (2) with figures (2)
Comment on liquidity (2) with figures (2)
Decision based on evidence (2)

## Sample answer:

Since William has decreased his gross profit margin* (from 60\%to 40\%) it may be that he has reduced his selling price or suffered an increase in his cost of stock. It is possible that he may had more wastage during 2010 due to the nature of his business* There has been no increase in his overheads over the two years as the only change in the net profit margin was due to the decrease in his gross profit margin*. This indicates that he is maintaining the same level of overhead expenditure. The return on capital employed also indicates a decrease in his profitability situation from 280\% in 2009 to $55 \%$ in 2010. This may be due to the fact that his profit from 2009 has not yet been used to expand his business*.

In terms of liquidity the situation has worsened between the two years*. His current ratio has diminished from 2:1 in 2009 to 1:1 in 2010*. If this trend continues then he may have difficulty meeting his short term debts*. The acid test also shows a diminishing trend, down from $1.2: 1$ to $0.8: 1^{\text {* }}$.

Overall although William has sold more goods in 2010 his profitability has deteriorated*. Similarly his liquidity position has worsened. So both in terms of profitability and liquidity William is incorrect *in his belief that his business performance in 2010 is superior to 2009.

Balance narrations must be correct apart from N2 where any reasonable alternative may be accepted
(9)
(b) Explain the treatment of subscriptions in advance and subscriptions in arrears in the balance sheet of the Keswick Sports Club.
(5)

The key here is has the candidate clearly identified that subscriptions in advance is a current liability and stated a valid reason for this and similarly identified that subscriptions in arrears are a current asset and stated a valid reason. A further mark can be awarded if the candidate mentions that this provides club members with a true and fair view of the clubs finances

## Sample Answer

Subscriptions in advance should be shown as a current liability* in the balance sheet as the member has paid for a service that they have not yet received*. Subscriptions in advance should be shown as a current asset* in the balance sheet as the member is owing* this amount of money to the club. This will ensure that the members are provided with a true and fair view of the club's finances*.
